

**HAZARDOUS WASTE TRANSFER FACILITIES
RULE FACT SHEET, LSA Document #98-2(F)**

Overview

This fact sheet briefly outlines the amendments for hazardous waste facilities that, during transport, mix, combine, commingle, bulk, repackage (except in response to leaking containers or containers in poor condition), pump hazardous waste from one vehicle to another, transfer hazardous waste (including containerized hazardous waste) from one vehicle to another, or open hazardous waste containers for purposes other than for sampling, to notify IDEM of their existence.

Citations Affected

Amends 329 IAC 3.1-8-2

Adds 329 IAC 3.1-8-4

Affected Persons

These proposed amendments affect hazardous waste transfer facilities that perform certain activities as listed above.

Reason(s) for the Rule

There are few standards governing activities at hazardous waste transfer facilities. The purpose of this rulemaking is to locate and identify hazardous waste transfer facilities that conduct hazardous waste activities as detailed above.

Economic Impact of the Rule

The Indiana Department of Environmental Management (IDEM) has determined that this rule will have no fiscal impact on state or local governments since the state and local governments do not own hazardous waste transfer facilities. The economic impact on industry owned or operated transfer facilities will be minimal; only the cost of sending a written notification to IDEM.

Benefits of the Rule

This rulemaking should assist in preventing hazardous waste releases into the environment from these types of activities.

Effective Date

June 26, 1998
